RATCHETING TOURNIQUET
• Applies precise mechanical pressure
• Self-locking system
• Simple, intuitive “gross motor” operation
• Compact, lightweight, and rugged
• Designed for extreme temperature ranges
• 2 inch wide strap designed to reduce pain and lower risk of tissue and nerve damage

INSTRUCTIONS FOR USE:

1. PULL: Place tourniquet around injured limb. Grasp loop with thumb and PULL webbing to securely tighten tourniquet around limb.

2. LIFT: Lift lever arm of ratcheting buckle to tighten tourniquet until bleeding stops.

3. REMOVAL: Release tourniquet by placing finger under tan tab (marked “PULL TO OPEN”) and lift.

ONE HANDED:
For a one handed application, grasp loop with teeth to prevent slipping when tightening.

TRAINING: Obtain tourniquet specific training and familiarization before actual application of the TX ratcheting tourniquet system. Maintain proficiency and train with your tourniquet on a regular basis.
